What length of stair rod should I order?

Zoroufy® recommends stair rods be at least 1-1/2 inches longer than the carpet runner width. If a runner is 27" wide, order stair rods that are at least 28-1/2" long. This allows 1/4" space between the runner and bracket.

What length of wall hanger should I order?

Classic™, Regency™, and Grand Regency™ Wall Hangers should be ordered 1-1/2" longer than the rug or tapestry. If the rug or tapestry is longer than 72", add-on sets are available to extend the length of the wall hanger.

If using wall hanger clips with the Legacy® Adjustable Wall Hanger, the Legacy® Wall Hanger will be adjusted to the exact length of the tapestry. If the tapestry is 36", order a Legacy® Wall Hanger that is 28-48". If opting not to use the Legacy® Wall Hanger clips, order a wall hanger 1-1/2" longer than the width of the tapestry.

Can stair rods and wall hangers be custom cut?

Zoroufy® offers custom cutting at no additional charge for both stair rods and wall hangers. It is recommended that rods be cut 1-1/2 inches longer than the runner or wall hanging width.

What is the difference between tubular and solid rods?

Tubular rods are hollow while solid rods are not. Both styles are equally durable.

Can stair rods be used over runners on existing carpet?

Longer screws are available by request in cases where a carpet runner is installed over existing carpet.

Will stair rods fit over thick pile carpet?

Zoroufy® offers the extended end bracket in the Heritage Collection to accommodate thick pile (over 3/4") carpet and runners.

Will stair rods or stair-holds secure a carpet runner to the stairs?

Zoroufy® Stair Rods are designed for decorative purposes only. Another means of carpet installation must be used.

Can stair rods be bent to fit curved stairs?

Yes, Zoroufy® recommends using the solid rods from the Heritage® or Dynasty® Collections for curved staircases.

What is the difference between a floor register and a vent?

A floor register has a damper that can be opened or closed to control air flow. A floor vent does not have a damper.

Does Zoroufy require a minimum order?

Zoroufy® does not require a minimum purchase on any products.

What is the recommended care and cleaning for Zoroufy® products?

Zoroufy® products have a protective lacquer coating to resist tarnishing. Use

only a soft, dry cloth when cleaning stair rods. Cleansers and abrasives may remove the protective lacquer coating and cause tarnishing. When cleaning carpet, runner, or surrounding areas with chemicals or any liquid, remove Zoroufy® products and replace when area is dry. If cleaning natural finish wood floor register or vent, use only a dry cloth.

Terms and Conditions

Zoroufy manufactures stair accessories for indoor decorative purposes only. Zoroufy stair-hold and stair rod products should NOT be used as the sole means of carpet or runner installation. Products are not intended for outdoor or marine use.
